Engine Type: 300 horsepower			

Description

RAGNAR — 2026 Boston Whaler 360 Outrage

Meet Ragnar, a 2026 Boston Whaler 360 Outrage built for serious offshore fishing without giving up an ounce of comfort or capability. From the legendary unsinkable Whaler hull to the commanding center console, every inch of this boat is designed with one goal in mind: get you to the fish, and get you home safe.

Fishability runs bow to stern. No species can hide once Ragnar has them in its sights, and every system on board is tied together through an intuitive Simrad® touchscreen at the helm, so you're always in control.

Under the hood, triple 300-HP Mercury V8 outboards with Joystick Piloting deliver the kind of power-matched propulsion that gets you offshore faster and keeps you on the water longer, making Ragnar one of the most capable 36-ft. center console boats in its class.

Key Features:

- Triple 300-HP V8 Mercury engines with Joystick Piloting for precise, effortless maneuvering
- State-of-the-art helm station with Simrad electronics
- Reconfigured bow seating for more space, easier access to the windlass/anchor, and improved bow fishability
- Upgraded storage throughout, with more usable bow storage, a more organized cabin, and a proper designated sleeping space in the V-berth
- Centerline hardtop access for added security moving around the boat
- Trailer included
